### NRHP Evaluation

GAI Consultants, January 2019

The resource is recommended not eligible under Criterion A due to a lack of significant association with an important historic transportation system, program, event, trend, or policy identified through a historical context. Although a WPA stamp is present, the year does not coincide with the manufacturer's date. No record of a WPA project in Ivydale was discovered. While the bridge is named for former State Representative, J.C. Cruikshank from Ivydale, the bridge lacks a direct association with Cruikshank or any other historically significant individuals. As such, the resource is recommended not eligible under Criterion B. However, the bridge retains the historic integrity necessary to convey its engineering and design significance. Due to this significance, the building has been previously determined eligible for the NRHP under Criterion C and maintains integrity to remain eligible.
